

## **2010 WREB Dental Examination**

Welcome to the University of Washington School of Dentistry. The School of Dentistry as general background information about the facilities and services available for WREB examination candidates provides the following information.

### **Exam Location**

The School of Dentistry is located south of the main campus, in the Warren G. Magnuson Health Sciences Center, 1959 NE Pacific Street, Seattle, WA 98195 (See enclosed map). The clinical portion of the examination will be held in the D wing of the Health Sciences Building. A tour of the facility for candidates will be conducted prior to the Candidate Orientation. We encourage candidates and their assistants to attend. Please refer to your board schedule for exact time of school tour.

### **Warren G. Magnuson Health Sciences Building**

SMOKING IS STRICTLY PROHIBITED throughout the entire Health Sciences Building.

Telephones are located in the dental clinics for dialing out only. They do not accept incoming calls. Dial 9 to access an outside local line. Pay telephones are located near Hogness Auditorium on the fourth floor.

Emergency Telephone Messages: May be left with UW SoD staff the day of exams. Please direct calls to either 206-616-7445 – D2 Clinic Receptionist or 206-543-5003 – D2 Dispensary Tech. You will receive messages at your assigned unit.

Restrooms are located throughout the Health Science facilities. Handicap accessible restrooms are available on the first floor, D Wing.

Lost and Found: During the examination, the Sterilization Room (D338) will serve as the lost and found area. We will hold items for one week (7 days) following the exam, and will then become the property of the UW School of Dentistry, or donated appropriately. The University of Washington School of Dentistry assumes no responsibility for dental instruments or personal effects that are lost or stolen from the dental clinics or laboratories.

### **Parking**

Exam Candidates, Assistants, and Patients should park in Visitor Parking – Lot S-1. See enclosed map. The fee is \$15.00 Monday – Friday, \$6.00 on Saturday, and complimentary on Sunday and Monday (Memorial Day). Parking attendants will be available beginning at 6:30am Saturday morning. If you park prior to 6:30am, you may receive a parking violation. For updated parking information, visit the parking services web site: <http://www.uwcommute.com> or the parking services audio library at 206-685-1543.

The Health Sciences Building is not accessible from Triangle Parking on Saturdays or Sundays.

## Information for Screening Prospective WREB Patients

Candidates must provide their own patients. The School of Dentistry does not provide patients for candidates. In accordance with Washington State Law, candidates may not review University patient records. Candidates may utilize clinic facilities at the School of Dentistry for screening patients at specified locations and times. Candidates may schedule screening appointments beginning Monday, May 3, 2010, by calling the Clinic Receptionist at 206-543-6494. Screening hours are Monday through Friday between 10:00am – 12:00pm and 2:00pm – 4:00pm. The last day to screen patients is Wednesday, May 26, 2010.

Candidates may take dental radiographs for prospective patients by appointment in the UWSOD Radiology clinic. Candidates will pay \$71 for each FMX. Contact Radiology at 206-543-5006, Room B307 to schedule an appointment. X-ray developers are calibrated for F-speed film in the dental clinics, and for D-speed film in the Endodontics Lab.

### **The candidate must provide:**

Rinn Kits

Gloves, face masks, protective eye wear and clinic apparel

Sterile instruments

Charting materials

### **The School of Dentistry will provide:**

Radiographic machines

Dental treatment area

Paper goods and barrier control covers

### **Supervision**

The School of Dentistry Faculty will provide general supervision of patient screening. Responsibility for patient selection for the board examination belongs to the candidate.

### **Fees**

There is no charge for the use of the Clinic facilities, however in exchange for this courtesy, we expect candidates to conduct themselves in a professional manner, adhere to standard infection control procedures, and to clean the treatment area at the completion of the screening visit.

### **Limitations**

External candidates are not registered students at the University of Washington and not licensed in this state, therefore, they may not provide any care for patients prior to the Board Examination. Screening of patients in the School Facilities must have Faculty supervision.

## Clinic Facilities

**Instruments and Equipment:** Candidates shall provide their own instruments and equipment. The School of Dentistry does not have equipment, hand pieces, adapters, ultrasonic scalers, instruments, heat sources, carts, or lockers for loan or rent. The UW SoD provides assistant chairs, operator chairs, and work surfaces in each operatory.

Example of dental clinic unit used during WREB examinations

The UW School of Dentistry utilizes "6 pin" hoses/lines for our high speed hand pieces in all clinics and the Endo lab. Any brand of 6-pin swivel/hand-piece work in our clinics and lab provided that the fiber optic bulb be incorporated into the swivel or hand piece. Slow speed hoses/lines are set up to work with standard "4-hole" hand pieces and do not have fiber optic capability or water. The UW School of Dentistry does not rent or loan equipment during the WREB. If you have a 5-hole high-speed hand piece, you need to purchase an adapter for 5-hole to six pins prior to your arrival at UW SoD. This adapter is available for purchase from most dental suppliers. For additional questions, clarification, or specific hand piece information, contact our Dental Maintenance department at 206-543-5958 or [repair@dental.washington.edu](mailto:repair@dental.washington.edu)

**Dental Chair:** The Pelton Crane "Coachman" dental chairs have foot switches on the floor and finger switches on both sides of the chair backs for positioning the patient. The chairs are bolted to the floor to prevent sliding but can be swiveled 30 degrees in either direction by loosening the black round knob located just beneath the back of the chairs.

**Operatory Light:** The A-Dec operatory light has an on-off switch located behind the reflector. Please do not attempt to clean the reflector.

**Ultrasonic hookups:** All units are equipped with quick-disconnect hook-ups for use with ultrasonic scalers. Candidates will need to attach their own ¼" male quick-disconnect fitting to Cavitrons for use in our dental units. Electrical and water outlets are located on the box on the left side of each unit. The School does NOT provide ultrasonic scaler, tips, or the ¼" male quick-disconnect fitting.

**Air, Water and Suction Delivery System (A-Dec):** Master Switch – the first switch to the left on the manifold turns on the light, air, water, and vacuum system. An orange light beneath the master switch indicates the system is on.

The air/water syringe tip – pushes in and pulls out.

Chip Air for the hand piece - turning the small yellow knob adjusts the volume of air.

Water for the hand piece – There is an on/off switch for the water located just to the left of the blue control knob for water volume. This blue knob controls the water to the high-speed fiber-optic line, which hangs on the right hand side of the unit. There is no water to the low speed line in the center.

### Storage

The UW School of Dentistry does not provide storage lockers for candidates. Candidates may use the cabinet located in their assigned cubicle during the examination, however, all items must be removed by the end of the last day of the exam – May 31, 2010. Items left in the clinics or cabinets following the exam will be held by the site coordinator – Terri Harker, Room D358, 206-685-7601 for 7 days, after which they will become the property of the UW School of Dentistry, or be donated appropriately. The UW School of Dentistry recommends that candidates do not leave items of value unlocked in the cabinets or clinics at any time.

### Emergency Procedures

Emergency Evacuation - IF FIRE ALARM ACTIVATES, EVACUATE THE BUILDING.

Examiners, staff, and candidates should assist patients in leaving the building in the event of a fire or other emergency requiring evacuation. Emergency evacuation route signs are posted throughout the clinical areas and hallways. Elevators must not be used in the event of a fire or other such emergencies.

#### Medical Emergencies

Please follow the instructions posted in each cubicle in the clinic. In case of a medical emergency, dial '911'. One person should stay with the individual who has the medical emergency and one person should go outside on the first floor between the D and B Wings adjacent to the S-1 parking lot, to direct medical personnel to the patient.

#### Body Fluid Exposure

Perform First Aid:

Eyes: Wash eyes at eyewash station

Other: Wash injured area with soap and water and apply appropriate dressing from First Aid kit.

Notify Clinic Manager/ Site Coordinator and call Campus Health Services, 598-4848, immediately. The Employee Health department recommends starting laboratory tests and medications for HIV post-exposure prophylaxis within 1 to 2 hours after exposure. Clinic Manager/ Site Coordinator will provide source patient counseling and take your source patient to UWMC lab for a blood draw. You will be seen in Employee health for counseling and/or a blood draw.

Work with Clinic Manager/ Site coordinator to fill out an Unusual Incident/ Accident Report.

## **Patient Treatment Area & Clean up Procedures**

Candidates will be assigned a clinic unit including a mobile tabletop to use as a work surface. They are responsible for the care and cleanliness of the entire clinic unit. Candidates are responsible for any damage to equipment. In addition to the placement of paper covers on counter tops, all work surfaces are to be disinfected between patients with materials provided. All items should be disinfected at the end of each day.

### **Prior to each procedure:**

- Using a germicidal disposable cloth, the assigned clinic units should be wiped down and infection control barriers should be placed. Infection control barriers are located at the entrance to each clinic and are available for use by the candidate or their assistant. Barriers are to be taken as needed, and are not to be stored in clinic units.

### **At the end of each procedure:**

- The high volume evacuation hose and saliva ejector hose must be flushed. This is accomplished by holding the suction tip directly in the water stream from the tap in the sink. Run for approximately 60 seconds.
- Remove all infection control barriers from the light, chair and work surfaces being careful to avoid cross-contamination. Dispose of the coverings in the large containers available in each end of the clinic. All surfaces, especially those not covered, should be disinfected with the germicidal wipes as provided. Be sure that no debris remains between the seat and back of the chair.
- Mercury and amalgam scraps should be placed in the special containers marked "Amalgam" which is provided in each cubicle. Be sure to tighten lid after each use. Ziploc bags are provided inside the cabinet under the sink for empty amalgam capsules. Be extremely careful not to allow mercury and amalgam to drop on the floor. Should this occur, notify WREB Exam Staff and the Maintenance Staff will be called for clean up with a spill kit.
- Needles, carpules, and other sharp or breakable objects must be placed in the red "Sharps" containers in each cubicle. These objects present serious hazards to the personnel collecting waste and must NEVER be placed in regular waste containers.

Debride contaminated instruments in the pre-sterilization area – Room D352. Repackage for sterilization.

### **At the end of each day:**

Wearing clean gloves use the germicidal wipes provided to clean work surfaces in the cubicle.  
Turn off the master switch of the A-Dec unit.

## **Bio-hazardous Waste**

Bio-hazardous waste includes any item contaminated with blood or saliva, such as gauze, dental floss, cotton rolls, etc. Bedside bags are available in each unit for disposing of materials at chair-side. All bio-hazardous waste requires special handling; it should be disposed of in clearly marked containers in the clinic.

**Instrument Sterilization**  
**Pre-Sterilization, Room D352**  
**Sterilization, Room D338**

The operating hours for sterilization will be 7:00am – 6:00pm during the examination. The School of Dentistry staff will sterilize clearly labeled, packaged instruments; however, candidates are responsible for debriding instruments and packaging in preparation for sterilization. Ultrasonic cleaning and wrapping may be done in pre-sterilization (D352). Sterilization pouches and wrapping supplies are available in the pre-sterilization room. It is the candidates' responsibility to clean, package and clearly mark package as follows:

CANDIDATE NUMBER/DATE/TYPE OF STERILIZATION (autoclave or dry heat)

The UW School of Dentistry Sterilization Staff reserves the right to refuse sterilization service for inadequately or inappropriately packaged materials. The Staff will be happy to assist you with packaging or sterilization of unusual size items. The sterilization facility has dry heat, autoclave, and chemiclaves. Unless otherwise specified, your instruments will be processed in the autoclave.

PLEASE ALLOW 60 MINUTES TURN AROUND TIME FOR INSTUMENT PROCESSING.

**Laboratory Facilities**

The dental laboratory is located in room D165 and is open until midnight on Saturday and Sunday of the exam. The facility has six ovens, four casting machines, four sandblaster, four lathes, model vibrators, and vacuum mixers. Laboratory supplies provided include Cristobolite, Cera-Fina, Resin rock, waxes, sprues, pins, Prevox, and lining materials. The University does not rent or loan lab or other equipment, ModuPro, adapters, heat sources, instruments, or hand pieces.

**Endo Lab**

The Endodontic exam will be held in the D1 lab. Candidates will be mounting their own ModuPro on a manikin (screw type) which is provided in our D1 Dental Simulation lab. The University of Washington will not be supplying the ModuPro for candidates. Candidates should contact Acadental directly at [www.acadental.com](http://www.acadental.com) or by phone (913) 384-7390 for purchasing the Acadental ModuPro kit - (MP E120). The Acaddental ModuPro kit (MPE E120 is the only kit used at our exam site. The Columbia dentoform will not work with our manikin.

## Commercial Dental Labs

The following list of local commercial laboratories that the candidate may use for fabrication of gold castings (page 10). The candidate should contact their lab of choice as soon as possible. Please note that this listing does not constitute a recommendation.

The School of Dentistry has designated room D251 (patient reception area) as the pick-up and drop-off location for commercial laboratories. Candidates wishing to use the pick-up area must register with the staff in advance in D251. Please provide the candidate name and number, patient name, name of the commercial lab and the lab telephone number at the time of registration. Please be sure to have payment arrangements for the lab made in advance.

### Commercial Dental Labs - University of Washington Vicinity 2010

Crystal Dental Lab 414 3rd Avenue West Seattle, WA 98119 (206) 283-6464	D&D Dental Lab 6206 168th St SW #D Lynnwood, WA 98037 (425) 742-0100	Harrison Dental Lab 206 Kirkwood Mall Kirkland, WA 98033 (425) 822-4525	Seattle Dental Lab 1305 4th Ave, #1001 Seattle, WA 98101 (206) 621-8698

## Dental Supplies - Operative

Supplies listed below are provided to all candidates during the exam. They are available at the dispensary located inside the D2 clinic. Alternatively, Burkhart Dental Supply will be present with a variety of disposables and materials free for your use, as well as selected items for sale during the exam.

Amalgam capsules and TPH composite	Evacuator tips	Polishing powders for restorations
Articulating paper	Face masks	Prophy paste
Autoclave tape	Facial tissue	Retraction cord
Infection control barriers for chairs and unit including trays	Floss	Rubber dam
Cement – temporary and permanent	Gloves	Rubber dam napkins
Cotton pellets	Hemodent	Saliva ejectors - standard
Cotton rolls	Impression materials	Soap
Cotton squares	Local anesthetic	Styrofoam trays
Cotton swabs – q-tips	Matches	Topical anesthetic
Counter paper	Mouthwash	Trash bags
Disinfectant	Needles – short and long	Wedges
Drinking cups	Paper towels	X-ray developer and fixer
Dycal	Patient bibs - napkins	X-ray film

### Dental Supplies – Endodontics (Available in D165 day of exam)

Endodontic files	Gutta percha	Medicine cups
78% & 95% alcohol	3 cc irrigating syringes	Roth Root sealer
Bleach and paper cups	2 x 2 gauze	Matches
Chloroform	X-ray film	Cotton pellets
Needles	Film clips	Hand dip tanks
X-ray developer and fixer	Absorbent points	Daylight loaders are available in dental clinics
Face Masks	Gowns	Gloves
Paper towels	Paper for bench top	Rubber dams
RC-Prep (EDTA or other materials)	Red rope wax	Suction tips
X-ray film	X-ray mounts – 4 hole	X-ray clips

Our handpiece hook-ups are designed for a 6-hole hand piece or adapter. Adapters are not supplied. Air and water are available. Gas and 95% alcohol are available for heat source. The Candidate must supply his own heat source – Bunsen burner, etc. The School does not supply a heat source for candidates. The University of Washington will not be supplying the ModuPro. Candidates should contact Acadental directly at [www.acadental.com](http://www.acadental.com) or by phone at 913-384-7390 for purchasing the Acadental ModuPro kit. Acadental ModuPro kit - (MP E110)
