

WREB
RESTORATIVE EXAMINATION
Lane Community College
Exam Dates: May 30- June 4, 2012 and October 26-28, 2012

CLINIC INFORMATION & EQUIPMENT TYPE

The LCC Dental Clinic is located on the lower level of Building #4 in Room #108. It has an open floor plan with twelve ADEC dental units for candidates equipped with a minitrol over-the-client delivery system. Each unit also has a mobile cart. The operator can place a tray set-up on the minitrol or the mobile cart, according to the candidate's preference.

FACILITY PROTOCOL

PPE's: The candidate is required to wear a bring and wear a lab jacket and protective lenses.

The testing facility will open at 6:30 am and close at 7:30 p.m. each day of the examination.

FACILITY PROTOCOL

Setting up the Dental Unit and Treatment Area

Gather the barriers you need and begin setting up your treatment area. You may wear exam gloves or clean hands with previously cleaned and disinfected items. Place large barrier bags over the back of the chair; the cart; and the patient delivery system. Place high speed evacuation tip, disposable air/water syringe tip, and high speed and slow piece handpieces on unit.

Use of Barriers: *Plastic disposable barriers are used to cover the following items and surfaces:*

- Minitrol and tray--large plastic bag
- Unit mobile cart top--large bag
- Unit chair--large bag

Waste Disposal

Amalgam waste is contained in a medium plastic bag attached to the typodont mount during the exam. Dispose of the amalgam waste in amalgam scrap container. Empty capsules in amalgam waste container then reclose/recap amalgam capsules and place in amalgam collection container provided for capsules at recirculation window.

Sharps disposal containers will be available close to the dental units used during the examination. Dispose of all sharps (burs, matrix band or broken instrument) in the sharps container. Notify the site coordinator if you need access to the reprocessing area (sterilization area). Dispose of amalgam contaminated supplies at the recirculation window. Other disposable waste should be placed in large waste containers and in-counter receptacles throughout the clinic.

Cleaning Up Procedures and Prep for next Candidate

Wearing PPE's remove and dispose of amalgam contaminated supplies and barriers. Remove bag attached to manikin pole and dispose of amalgam scrap in the scrap

amalgam container. The next candidate to use the unit will re-bag/barrier the unit, adjacent working areas and equipment for his/her own use.

MATERIALS AND SUPPLIES AVAILABLE

BIREX surface disinfect or disinfectant wipes	Paper towels
Instrument trays (plastic and disposable)	Dental Floss
Face masks	Cotton swabs
2x2 gauze squares	Small plastic dappen dishes
Disposable napkin holders	Amalgam Scrap containers
Plastic disposable barrier bags (various sizes)	Antimicrobial Mouthwash
Medium plastic bags for rod post amalgam scraps	Soap
Standard saliva ejectors	Cotton rolls
Non-latex gloves	Paper towels
Disposable air/water syringe tips	Autoclave bags
Drinking cups	Alcohol
Disposable prophyl angles	High Volume Evacuator
Rod posts for dentiform at each unit	Amalgam waste container

RESTORATIVE EQUIPMENT

8 Amalgamators will be located throughout the dental facility on counters and islands for easy access by candidates. Curing lights will be available at each dental unit. After the clinic tour there will be time for candidates to test operation of amalgamators and handpieces. Handpieces should be brought to the examination by candidates. Please see handpiece information below.

A limited number of Slow and Highspeed Handpieces will be available during the examination for use by candidates. **Lane recommends candidates bring their own equipment that they are familiar with to the examination.** Please notify the Chief examiner or LCC School Coordinator (541-463-5279) if you will need to use a handpiece for the examination. Lane will not be responsible for loaned equipment malfunction during the examination.

The two clinic islands will have disposable supplies. Designated containers for disposal of scrap amalgam and contaminated waste are at the recirculation window.

A cart will be located at each dental unit for equipment and supplies. The dental unit over the patient delivery system can accommodate a tray set-up for instruments. All dental units accommodate left and right handed clinicians. Each dental unit has two electrical plugs located on the dental unit base. The candidate may bring their own amalgamator and/or curing light.

HANDPIECE AND PROPHY ANGLE HOOKUPS

Handpiece connections are 4 hole Midwest Type back end configuration for both slow and high speed handpieces. There are two handpiece hoses at each unit. It is recommended that all restorative candidates bring their highspeed and low speed handpieces with them to the orientation and tour the day before the exam to verify they have the correct components.

Metal prophy angles and contra angles must be provided by the candidate.

EMERGENCY PROTOCOL

Portable oxygen tanks are located at both the east and west ends of the main clinic area. The emergency drug and first aid kit are located on the glassed-in desk at the entrance to the clinic.

In case of emergency, the following protocol should be used:

1. Candidate remains with the patient and asks for assistance.
2. Another candidate or examiner calls 9-911 for emergency response.
3. Another candidate or examiner calls 5555 or 9-942-6455 for assistance from Campus Security.
4. Another candidate goes outside the Dental Clinic building to lead emergency responders to the location of the patient.
5. Oxygen is administered, if appropriate. (Bag, mask, valve, nasal canula, pocket mask)
6. CPR is administered, if appropriate
7. AED administered if appropriate. The AED unit is located on the east end of the south wall in the clinic. The AED unit is stored in a wall mounted, glass front cabinet.
8. Emergency treatment is administered, if appropriate, i.e. sweetened juice or glucose for insulin shock. A protein drink is also available for emergencies.
9. All other candidates leave the examination area until the emergency situation has ended.

LCC DENTAL CLINIC LOCATION AND PARKING FACILITIES

The Dental Clinic is located on the lower level of Building #4 in Room #108. Candidates, patients and examiners should park in the Parking A or Parking B lots designated on the campus map. There are no reserved or designated parking spaces for dental clinic personnel, students or patients. There are handicapped spaces clearly marked in all parking lots. All parking is free.

FOOD AND LUNCH FACILITIES

There are vending machines in the Physical Education Building lobby (Building #5) adjacent to the Health Building (#4). Weekdays food services, cafeteria style, are available in the Center Building. The Health and Wellness building #30 next to the dental clinic has a snack counter with a variety of sandwiches and salads available. No dining facilities will be open on campus on Saturday or Sunday. North of the LCC campus, off I-5, there are many restaurants on Franklin Blvd.
