Phoenix College Fact Sheet **WREB Dental Hygiene Exam**

Clinic Equipment:

There are 15 A-dec Radius operatories in the dental hygiene clinic consisting of a cart, dental chair, overhead light and radiograph view box. Each cart is equipped with a Cavitron unit. The operatories *cannot* accommodate the use of sonic scalers. The Cavitron units are Dentsply SPS brand and use a 30K insert. The units are equipped with self-contained water systems that will be maintained by the floor assistant.

A limited number of dental units will be made available for those who prefer to provide their own ultrasonic. The facility will not be able to support any outside equipment used during the exam. Equipment compatibility should be confirmed during the *Exam Tour* the day before the exam.

X-Rays: Digital radiography is utilized at Phoenix College. If you are required to take x-rays during the exam, you will receive instructions from the floor assistant on using our phosphor plates and equipment. Those needing to take a FMS on their patients can do so on Thursday, May 17th. See registration form.

Equipment Rental:

The following equipment will be available to rent on the day of your clinical exam:

- Slow Speed Handpiece (Midwest 4-hole inserts)
- Dentsply Cavitron tips (30K universal)
- Mirrors, explorers, probes and anesthetic syringes

Rental policy: You cannot reserve equipment in advance. An adequate supply of equipment will be available at the clinic reception desk on the day of your clinical exam. A sample rental form is attached. There is a \$20.00 non-refundable fee for use of an air motor or cavitron tip, and a \$5.00 non-refundable fee for use of a mirror, explorer, probe or syringe. We accept check or cash payments - change is not usually available.

Parking / Phoenix College Map

Candidates and their patients will use the parking lot located in the northeast end of campus (11th Avenue and Flower Street). The Dental Building 'R' is located in the south end of this parking lot. Any of the parking spaces in this area may be used, except for the *yellow-lined* areas reserved for faculty and staff. A map of the campus and driving instructions can be found at: <http://www.pc.maricopa.edu/map>

Patient Availability / Local Anesthesia Administration:

Phoenix College does *not* have patients available for candidates taking the dental hygiene exam. Phoenix College also does *not* have anybody available to administer local anesthesia for candidates.

Expendable Materials Supplied:

The following materials will be available on the clinic floor:

- cotton gauze, rolls and applicators
- nitrile exam gloves (small, medium & large)
- prophylaxis paste/prophylaxis cups
- masks (ear-loop type)
- overgloves
- tray liners/patient napkins
- hand soap and antimicrobial mouth wash
- barrier wrap and covers & disinfectant wipes
- disposable patient check-in tray
- disposable air/water syringe tips & saliva ejectors
- biohazard bag for cart
- disposable prophylaxis angles
- sterilization bags
- topical anesthetic
- 2% Lidocaine with 1:100,000 epinephrine
- 4% Citanest Plain without vasoconstrictor
- anesthetic needles (25 & 27 gauge)
- *candidates may supply other preferences*

Infection Control Protocol
WREB Dental Hygiene/Local Anesthesia Exams

Unit Disinfection:

Flush waterlines for 30 seconds before setting up operator. ProSpray disinfectant wipes will be available for use near each unit. Wipe and maintain agent contact with the surface being cleaned for 15 seconds. Disinfect the entire unit including handpiece lines, hoses, air/water syringe, HVE, saliva ejector, working surfaces, Cavitron unit, view box, light handles and switch to complete cleaning phase. Once completed, use another disinfectant wipe to wet all surfaces a second time to complete disinfection phase. Allow disinfectant to dry for 10 minutes. Use gauze and soapy water to clean the operator and patient chairs, and the lens cover of the dental light. Do not use disinfectant on the lens cover, it will cause clouding.

Barrier Wrapping of Unit:

After proper disinfection of unit, surfaces that may be contacted during patient treatment must be wrapped with plastic film. You will be provided with rolls of plastic wrap and plastic dental chair covers. Chair covers can be used to cover the patient chair, dental unit, Cavitron, and counter surfaces. Plastic wrap will be used to cover the light handles, operator chair adjustment knobs, and the patient mirror mounted on the light. Plastic sleeves will be provided to cover the attachments and cords of the handpiece, Cavitron, HVE, and air/water syringe.

Waste Disposal & Evacuation System

You will be provided with a small biohazard bag to be attached to your cart while treating your patient. Please discard into this bag, all **blood or saliva soaked** disposables. After treatment, tape the bag closed and place in the biohazard receptacle located in the main clinic island. Used plastic wrapping and patient disposables that are not biohazardous can be placed in the trash containers located at each handwashing island. Used needles, anesthetic cartridges, broken instruments or any other sharps are to be disposed of in the *sharps containers* located at each unit.

The floor assistant will ask each candidate using the clinic at the end of the day to run vacuum system cleaner through the evacuation hoses. The units are equipped with self-contained water systems that will be maintained by the floor assistant.

Instrument Sterilization:

Instrument sterilization will be available to those who *desire* it. Please place instruments in sterilization bags clearly labeled with your name. Do not seal the sterilization bag if you want your instruments ultrasonically cleaned, seal the sterilization bag if you do not want them ultrasonically cleaned. Sterilized instruments can be picked up at the front desk, usually within a couple of hours. Instruments received at the end of the day can be picked up the following day. There will be **no** sterilization available at the close of the last exam day.

Patient Evaluation/Radiographs

for Candidates of the WREB Dental Hygiene Exam

Dear Candidate,

The Dental Hygiene Clinic at Phoenix College will be available to candidates of the Western Regional Examining Board's Dental Hygiene Exam who would like to evaluate or take radiographs on their patients. Candidates will be unsupervised during this session, except for assistance with equipment and supplies.

Date: Thursday, May 17, 2012

Cost: \$20.00 Per time selection for screening

Time: 1:00 - 3:00 PM, or 3:00 - 5:00 PM

\$30.00 Per set of digital radiographs

Note: You will *not* be assigned a specific time to arrive - you may come any time within the chosen time selection, but must be finished by its end.

General Information

All candidates using the facility are required to:

1. Supply their own patient and instruments
2. Complete patient within selected time frame

Supplies provided by Phoenix College are:

1. Chair and operatory cart
2. Sterilization access and supplies
3. Use of ScanX digital plates/print out of x-rays

Make checks payable to **Phoenix College** and mail with form below to:

Emergency Protocol
WREB Dental Hygiene/Local Anesthesia Exams

Procedure for Reporting an Emergency:

- A. The person who discovers the emergency will verbally alert a WREB official
- B. The WREB official will assist by:
 - 1. Delivering oxygen and the Medical Emergency Kit
 - 2. Alerting the front desk to call 9-911 and Campus Safety at 5-7254
- C. Meanwhile, the person who discovered the emergency will begin a primary assessment:
 - 1. Check for responsiveness, airway, breathing and pulse. *IF* there is no breathing and/or pulse, artificial respiration or CPR is started immediately.
 - 2. If there is breathing and pulse, a secondary survey should be started including review of medical history and recording of blood pressure and pulse every 5 minutes.
 - 3. Oxygen support should be instituted if any signs of lack of oxygen are noted.
- D. WREB official summoned will:
 - 1. Immediately go to the emergency location
 - 2. Assess client and assume responsibility for emergency treatment until someone with more training has arrived and all pertinent information has been relayed.
- E. Following the emergency:
 - 1. If 911 is notified, an Incident Report must be filed with Phoenix College Campus Safety.
 - 2. The emergency must be documented in the patient's record.

Location of Emergency Equipment:

- A. One oxygen unit is located on the south wall of the Dental Hygiene Clinic
- B. One oxygen unit is located in the Examiner's Lab
- C. Pocket ventilation masks are located on supply shelves
- D. The Emergency Kit and remainder of emergency equipment is located in the Central Supply area.
- E. The Automatic External Defibrillator Unit is located on the wall, just outside the sterilization room.

Evacuation Plan: Posted throughout the building near the fire pulls and exits

Phoenix College Safety
